Another yearlong gift is *The New Herbal Calendar 2004*. This calendar is literally a work of art. Written by author/garden writer Thomas Lee and illustrated with watercolor by those noted artists, the calendar is seasoned with watercolor gardening tips. Also available are Lee's herbal rose cards, videos and book, *The Herbal Home Companion*. Note: if you order directly from Country Thyme, you can request that your item be autographed by the author.

Here's a handy tool for herb gardeners and cooks. Herb Snips™ feature serrated blades that never require sharpening. They pull apart for cleaning and are dishwasher safe. What makes these snips-scissors unique are the notches along the blade designed to strip herb leaves from their stems. What in my hand and the short blade is perfect for harvesting herbs. SilverMark suggests you'll find countless other uses for this kitchen tool such as chopping dried fruit and snipping the ends of green beans and snow peas. Herb Snips™ are available at select independent retailers and catalogs like Suburban or you can order direct from SilverMark.
