snips

Herb Snips are a versatile tool for snipping and mincing herbs, scallions, and other delicate plants. A special herb stripper is built into the blade for removing herbs and leaves from stems. It's also great for trimming houseplants and pruning in the garden. The ergonomic, rounded handles provide comfort and control. Silvermark, 800-231-4114, www.silvermk.com. \$10.

STEFANIE OLIVER, PHILADELPHIA, PA

"It was easy to remove herbs from their stems with the herb stripper. I will use this tool season after season."

LISA PERTRILLO, NEW HYDE

PARK, NY "I used the Herb Snips on herbs, green beans, and broccoli. They easily cut through tough stems. The snips came apart so cleanup was easy."

TESTER RATINGS

Ease of use	9.4
Clarity of Instructions	9.0
Performance	9.4
Overall Average	9.2
