Why Didn't I Think of It?

A better whisk, a smarter can opener, choppers and slicers that take the tedium out of salad-making...and look sharp, besides.

THE SAFER CAN OPENER
This powerful, easy-to-grip steel tool with soft, comfortable handles and forcing knob quickly removes the lids of cans without creating jagged edges. **OXO, \$25.**

HOW STIRRING
The flexible wire construction and weighted balls of this stainless steel whisk mean no lumps in the hollandaise sauce. Plus it's easier to clean than traditional wire whisks. **Wilton Design Store, \$24.**

A CUT ABOVE
Multiple stainless steel serrated blades yield progress, whether tomato slices in a fresh. Speed up your prep time by using this as lemons, bell peppers, and some soft cheeses. **Proctor, \$25.**

SALAD DAYS
Use this gadget like a pair of scissors to dice lettuce, onions, cucumbers—almost any vegetable—right in the bowl. It's a speedy way to get your greens without having to clean the cutting board. **Fox & Chap, \$30.**

SALAD DAYS
Use this gadget like a pair of scissors to dice lettuce, onions, cucumbers—almost any vegetable—right in the bowl. It's a speedy way to get your greens without having to clean the cutting board. **Toss & Chop, \$30.**
